Contents Volume 58

Contents

Minimizing the mean delay of quorum-based mutual exclusion schemes
N. Kobayashi, T. Tsuchiya and T. Kikuno 1

Hiding communication overheads in dynamic load balancing for multicomputers
H. Rim, J.-w. Jang and S. Kim 11

Fault-tolerant gamma interconnection network without backtracking
C.-W. Chen and C.-P. Chung 23

A learning database system to observe malfunctions and to support network planning
M. Zaki, H. Harb and T.S. Sobh 33

On the neural network approach in software reliability modeling
K.-Y. Cai, L. Cai, W.-D. Wang, Z.-Y. Yu and D. Zhang 47

Editor's Corner 63

Invited paper
Proportional sampling strategy: a compendium and some insights
T.Y. Chen, T.H. Tse and Y.T. Yu 65

A new encryption algorithm for image cryptosystems
C.-C. Chang, M.-S. Hwang and T.-S. Chen 83

Specification and analysis of *n*-way key recovery system by Extended Cryptographic Timed Petri Net
S.-Y. Lim, J.-H. Ko, E.-A. Jun and G.-S. Lee 93

A proxy-based security architecture for Internet applications in an extranet environment
A. Dowling and J.G. Keating 107

New nonrepudiable threshold proxy signature scheme with known signers
C.-L. Hsu, T.-S. Wu and T.-C. Wu 119

A dominance relation enhanced branch-and-bound task allocation
Y.-C. Ma and C.-P. Chung 125

Design of a scalable multiprocessor architecture and its simulation
D.-L. Pean, C.-C. Wu, H.-T. Chua and C. Chen 135

Understanding complex, real-world systems through asynchronous, distributed decision-making algorithms
S. Ghosh 153

Controversy corner 169

Making inconsistency respectable in software development
B. Nuseibeh, S. Easterbrook and A. Russo 171

Case study of the evolution of routing algorithms in a network planning tool
J. Akkanen and J.K. Nurminen 181

The design and implementation of an active replication scheme for distributing services in a cluster of workstations
L. Wang, W. Zhou and W. Jia 199

Improving the performance of time-constrained workflow processing
J.H. Son and M.H. Kim 211

A priority-based resource allocation strategy in distributed computing networks
Y.-F. Huang and B.-W. Chao 221

A study of page replacement performance in garbage collection heap
C.-T. Dan Lo, W. Srisa-an and J.M. Chang 235

Joint scheduling of garbage collector and hard real-time tasks for embedded applications
T. Kim, N. Chang and H. Shin 247

The effects of design pattern application on metric scores
B. Huston 261

An empirical study of XML/EDI
E.J.-L. Lu, R.-H. Tsai and S. Chou 271

Contents Volume 58 281
